**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the wiring layer" in line 11. There is insufficient antecedent basis for this limitation in the claim. Whether the wiring layer refers to a first wiring layer or a second wiring layer is not clear.

Claims 2-8 are also rejected due to their dependency upon the rejected base claim 1.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ma et al in view of Tanigawa.

Regarding claim 1, as best the Examiner is able to ascertain the claimed invention, Ma et al discloses on figure 1 an integrated circuit comprising a

semiconductor substrate 20 including semiconductor devices; a first wiring layer 38 having an associated thickness being located over the substrate and having interconnect wire 48 embedded therein; a second wiring layer 58 having an associated thickness being located on the first wiring layer 38 and having interconnect wire embedded therein; and a capacitor having a first metal based charge storage electrode 26, a second metal based charge storage electrode 30, and a dielectric layer 28 interposed between the charge storage electrodes, the charge storage electrodes extending through at least part of the first wiring layer 38 wherein the capacitor is completely disposed in a window formed in the wiring layer. Ma et al does not disclose a capacitor extending through the thickness of the second wiring layer. However, Tanigawa discloses on figure 3 a capacitor extending through the thickness of the second wiring layer 10. In view of such teaching, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Ma et al by having a capacitor extending through the thickness of the second wiring layer for the purpose of increasing the capacitance of the storage capacitor per unit area as taught by Tanigawa (col. 2, lines 44-45).

Regarding claims 2-8, Ma et al and Tanigawa together disclose all the structure set forth in the claimed invention.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
